GORE-TEX INSIDE

If you want to spend the whole day out, you want to avoid numb fingers. Even in harsh, cold conditions the whole system of inner lining, membrane and outer material is optimized to keep your hands warmer for longer.

SAFETY LEASH

This cord is used to secure the glove to your hand with an elastic strap. A big advantage when you don't want to wear gloves but want to keep them attached to the wrist.

BREATHABLE SYSTEM

An air exchanging vent is placed on the back of the glove allowing moisture to escape. This improves the drying time of the glove and avoids hands getting wet.

REMOVABLE LINER

A removable lining where the back of the lining is built with a hot thick material whilst the palm is thinner to maintain sensitivity. The removable liner can be removed and washed.
